News of Interest to All

It is to be known as the California Apricot exhibit will be held at the park July 21 to 24.

Construction of a new \$100,000 St. Charles Catholic church at Bakersfield will begin within a short time.

Carlsbad farmers recently ordered a farm bureau unit to help solve their avocado, bulb and able problems.

Members of the Visalia chamber of commerce is being realized with construction of two strictly modern auto near Visalia.

A city of Lindsay has purchased 25 acres north of town for a swimming pool, playground and gardens.

Orange County Ice company is planning the erection of a new plant at Fullerton, according to reports.

The annual fiesta was held recently in commemoration of the founding of one of the world's great diversified farms thirteen years ago.

Herbert L. Reed, member of a law of Oakland, has accepted the position of adviser and head of the Real Estate association's legal arm.

Fifty varieties of roses in full bloom in the garden at the home of Frank Marshall, two miles west of Graton, Sonoma county, a beautiful sight.

Allocation of \$2,500 has been made by the national park service for preliminary survey relocating the Oak Flat road between Harder and Yosemite valley.

Charles Meyer, publisher of the Oakland "Leader", was elected treasurer of the California Press association at the annual meeting in Humboldt county.

W. DeTar, who has been serving as assistant farm adviser of Imperial county for the past four years, been selected as the successor of L. Garthwaite as farm adviser.

Mrs. Julia Rablin, who was buried in Dutch Flat recently, after her death in Oakland was one of the old pioneers of Placer county. She had lived in Dutch Flat for fifty-eight years.

Whitney Collins of Arkansas was elected president of the Motion Picture Theater Owners of America at the closing session of the organization's seventh annual convention in Los Angeles.

The residents of the Little Mountain community of Kaweah, Tulare county, have won their fight for a postoffice.

The order closing the office last fall has been rescinded, and the tiny mail station has reopened.

An architect has been commissioned to prepare plans for a high school building for the South Fork Union school district. It will be erected at Garberville, Humboldt county, and will cost about \$90,000.

The Bank of Italy building, under construction at Oroville, will be completed and ready for occupancy in a few weeks. It was stated by the contractor that the building is erected at a cost of approximately \$75,000.

The rooms which the Masonic lodge occupies at Yreka for the past fifty-five years are to give place to a new and modern temple, the contract for which has just been let. It will be a two-story concrete building and will cost \$50,000.

Tulare county is showing great prosperity this year. Abundant rains and sunshine have demonstrated the generosity of nature toward this section. Almost every phase of activity shows healthful symptoms, and the year promises to be fruitful.

Toots, the original Marshall monument cat brought to Coloma, Eldorado county, by Billy Miller, the first guardian, is still alive although now

Mrs. Helen W. Morrill, present guardian of the monument. Toots is declared to know when Sunday arrives. He retires to the attic of the park lodge and remains there until the last motorist has departed.

Mount Diablo, devil peak and long silent volcano hill of the Coast range will spout fire again. The "eruption" is scheduled for the evenings of June 18, 19 and 20, when colored fire will be touched off at the peak. The "outburst" is planned as a feature of the Diablo valley apricot festival and celebration of the new San Joaquin valley bridge opening, to be staged at Antioch.

With the arrival of Coalinga, Fresno county, of Vern C. Gorst, owner of the Pacific Air Transport company, with which the government has contracted for the air mail service for the Pacific coast north and south route, the Coalinga Chamber of Commerce believes that the city of Coalinga has been selected as a refueling and service air port of the Seattle to San Diego route.

Stockton High School's experimental farm, unique in California and believed the first of its kind in the United States, was formally opened at a meeting recently attended by officials of the state department of agriculture and Stockton public officers, school board members and representatives of civic organizations.

Herbert Wertheim, Hollywood, who made fewer and milder oratorical gestures than any of the six other contestants, won the third national oratorical contest at Washington, recently. Vice-President Dawes presented the cup.

"Development of power in the mountains and making other uses of the water resources of the Sierra Nevada mountains is the key to development of the San Joaquin valley." The speaker is Harold K. Fox, construction engineer of the San Joaquin Light and Power corporation at Fresno and head of that company's progress just beyond the eastern edge of the flat, fertile Garden of the Sun. This great undertaking is known as the Kings river project. It is designed to develop approximately 500,000 horsepower, or nearly three times the present capacity of the entire San Joaquin system. It will embrace nine power plants, fourteen dams of various types, nearly forty miles of tunnel, and a system of high tension transmission lines.

H. R. Braden and Charles L. Heartwell of Chico with State Architect George B. McLaughlin, of Sacramento, visited the Chico State Teachers' college at Chico, recently, and discussed with Charles M. Oenbaugh, president of the college, the budget for the college for the next fiscal year. The sum asked for is \$25,000 for repairs and improvements to present structure and \$100,000 for a new building. The new building is occasioned by the inadequate of conference room for the faculty, need of a home for the English and dramatic departments, and the president's private office is too small. The repairs include new and larger boilers, enlarging the engine house and other improvements.

Stating that traffic officers are vested with authority to make arrests for violations of traffic laws, Will H. Marsh, chief of the state division of motor vehicles, said none of the 210 motorcycle patrolmen and inspectors employed by his division would be deputized as "dollar-a-year" prohibition agents under the new federal dry enforcement plan. "The authority of the state traffic officers to make arrests for violations of other than traffic laws is simply that they are private citizens," Marsh stated.

An architect has drawn plans for a \$70,000 hotel building on the Victory highway at Ryde, Sacramento River point. The building will cover a space of 80x80 feet, and will be four stories in height, with fifty rooms. Concrete and California stucco in construction, the building will be in the Spanish-California style. Thoroughly modern equipment will be used. An unique feature will be the arrangement of the basement so that automobiles may be driven into the building in rainy weather.

When Luther Burbank, late plant wizard, perfected the spineless cactus a large lot at Santa Barbara owned by S. G. and J. L. Kelley, was planted to the desert growth and thousands of persons marveled at the plant that grew without thorns and bearing delectable pears. In the last few weeks, since Burbank's death, spines have appeared on the cactus and recently the city of Santa Barbara served notice on the owners of the patch to destroy them as weeds.

"One of the most important factors in agricultural economics is legislative apportionment and it is vital that a considerable farm weight be maintained in the assembly to assure a proper balance with that of the cities." This statement was made to over 500 persons who thronged Stevenson Grove at the annual Merced Farm Bureau picnic. The speaker was Earl Houghton, president of the California State Farm Bureau Federation.

The opening gun was fired in protest of the United States Bureau of the census estimates of Sacramento's population recently by the Sacramento chamber of commerce directors, when they appointed E. C. Porter, secretary-manager, to select special committeemen to look into the matter. The census estimate places the population at 73,400, while all available figures in that city show that it is in the neighborhood of 100,000.

Alpine county has fewer school teachers than any other county in California and a higher standard of training for its instructors. Miss Georgiana Carden, state school attendance supervisor, reported to Will C. Wood, state superintendent of public instruction. She said 100 per cent of the Alpine county teachers are college graduates, adding, however, that there are only three of them.

A thorough survey of Tehama county with a view to the fuller development of its agricultural and industrial resources is to be made by the Red Bluff Achean club. Five months will be devoted to the study, at the end of which it is hoped to have data of important value in promoting the prosperity of the county.

The city of Lindsay is planning to increase its water supply with the immediate drilling of a new well on the twenty-acre tract just north of the city limits. It will be drilled to a depth of at least 400 feet.

Real estate brokers and salesmen of Santa Maria have organized a real estate board founded on the basis of local, state and national affiliations.

Street improvements which will cost a total of \$50,000 are rapidly nearing completion at the town of Glend in the western San Fernando valley.

At a preliminary get-together meeting of the Yolo County Republican Central committee in Woodland, during a banquet the committee expressed itself as desirous of recommendations which would repeal the present county government act to raise the salaries of underpaid county officials. Carriages of long repose dust-covered in an old livery stable at Grass Valley, Nevada county, are soon to be giving atmosphere to screen productions by moving picture interests and ordered shipped to Hollywood.

Greatest of All Powers

In all nations truth is the most sublime, the most simple, the most difficult and yet the most natural thing.—Mme. De Sevigne.

Bitter Ending

Bitter ending is all right occasionally, but as a regular occupation it doesn't seem to pay.—Morgantown News-Democrat.

NEWS REVIEW OF CURRENT EVENTS

House Ratifies Settlement of French Debt—Egypt May Lose Independence.

By EDWARD W. PICKARD

SO FAR as the house of representatives is concerned, the settlement of the French war debt to the United States which was reached by the foreign debt commission and Ambassador Berenger is accepted. The Burdett bill ratifying the arrangement was passed by a vote of 236 to 112, after the house had rejected a motion to recommit with instructions to the ways and means committee to hold the measure until the funding arrangement is approved by the French parliament.

Eighty-eight Democrats voted in the negative on the bill, and were joined by twenty Republicans, two Farmer-Laborites and one Socialist. Fifty-one Democrats and one Socialist voted in the affirmative with 184 Republicans. The measure now goes to the senate, which, however, will await action by the French parliament. Unless this is forthcoming within two weeks the senate probably will not pass the bill before next winter, which would be a great disappointment to the administration.

The settlement, as ratified in the bill, is estimated by the treasury to be a 50 per cent settlement as compared with a 25 per cent settlement with Italy and an 80 per cent settlement with Great Britain, the percentages being based on the proportion of the total principal plus interest at 4 1/2 per cent to be paid. The debt is to be funded over a 62-year period with no interest for the first five years, after which interest shall commence at 1 per cent, increasing to 3 1/2 per cent in 1935.

WITHOUT a record vote the senate passed a bill to create a new office of second assistant secretary of war who would be charged with the supervision of the air corps and the co-ordination of its activities with other governmental agencies. The senate also passed the navy air expansion bill, and both measures went to conference.

WHILE the senate judiciary subcommittee was deciding that all prohibition measures should be shelved, there were two outstanding pronouncements on the booze question. Senator Borah of Idaho, addressing the Presbyterians assembled in Baltimore, came out so strongly in favor of prohibition and against the attempts to weaken enforcement that he was immediately hailed by the most enthusiastic dries as their national leader and a fit man to be nominated for President by the Republicans in 1928. Certain political speculators who have been trying to find signs of the waning of Coolidge's strength called attention to the fact that the Anti-Saloon leaders have kept away from the White House ever since the President made it clear he was not disposed to let Assistant Secretary of the Treasury Andrews be disciplined for his testimony before the senate committee, and made the most of this in their guessing that the dries were preparing to oppose the re-nomination of Coolidge.

Borah was unsparing in his denunciation of liquor and the liquor traffic, but, being a conservative constitutionalist, he made his strongest point when he said:

"Even a greater question than the liquor question is the capacity of the American people for constitutional government. The question of the hour is: Shall we live up to and enforce the provision of the Constitution until in the orderly method pointed out by the Constitution we see fit to change it? Can we enforce the law which we have deliberately made?"

"It is perhaps as definite and specific a challenge of our love for the Constitution, our capacity for self-government, as could be presented to our people. I am infinitely more con-

cerned about the willingness and ability of our people to meet that test than I am about the liquor traffic, brutal and ruthless as I know it to be."

ALBERT J. BEVERIDGE, former senator from Indiana, whose opinions on such matters are always worthy of consideration, severely criticized the recent order of President Coolidge empowering local officers to become agents of the government to help in prohibition enforcement. Mr. Beveridge was addressing the Historical society of Pennsylvania, and said in part:

"To make local officials also federal officials is in practical effect to destroy our political subdivisions, or, at the very least, to subject towns, cities, counties and state to a national control centralized at Washington. The former officer of our regular army who devised this change in the American system and who is in charge of the execution of it, tells us the constitutional pretext for it. He says that the hitherto exclusive police power of the states is now shared by the central government. If this military and bureaucratic exposition of constitutional law is sound, the planners and builders of American institutions wrought in vain."

It is obvious that if local officials can be made national officials to execute one national law, they can be made agents of a general and centralized government to enforce other national laws in every locality. If a careful President, like our present chief executive, would use wisely this unlimited and essentially autocratic power, a heedless President might use it recklessly.

REPRESENTATIVE TINKHAM of Massachusetts wants the house to investigate the Anti-Saloon league's capitol pay roll and to compel a disclosure of its congressional campaign expenditures. He more than intimates that the league pays congressmen for introducing or supporting bills. This Wayne B. Wheeler, general counsel of the league, flatly denies, and he declares the wet organizations are more in need of investigation than is the league.

CHARGES and counter-charges made exceedingly lively the closing week of the Republican senatorial primary campaign in Iowa. Senator Reed of Pennsylvania brought to the senate's attention the fact that Brookhart campaign literature had been inserted in franked envelopes with a speech which Reed had made opposing the unsentimental Brookhart, and mailed to Iowa voters. Brookhart and his campaign manager denied responsibility for this and the former declared it was a "frame-up bearing the earmarks of the Daugherty gang."

Major Lund, campaign manager for Brookhart, sent this telegram to Senator Reed of Missouri:

"Reports that Cummins campaign forces using an unlimited amount of money, estimated at \$500,000, and backed by federal and state patronage. State now flooded with paid Cummins workers in districts, counties and even precincts. As striking contrast, we have Brookhart, a poor man, backed only by people of Iowa and campaign committee laboring day and night to conduct a campaign with entire expenditure not exceeding \$5,000."

Managers for Cummins said their organization was large but that all the workers were contributing their time free.

EGYPT may soon lose its recently acquired independence and again become a protectorate of Great Britain. At this writing it all seems to depend on Zoglu Pasha, whose party won a great victory in the elections but whose return to the premiership will scarcely be tolerated by the British government. The situation is aggravated by the action of the Egyptian assize court which recently acquitted six out of seven persons accused of political assassinations and other crimes. Judge Kershaw, British president of the court, resigned in protest, and the British government has declared to the Egyptian government that it does not accept the court's judgment and reserves full liberty to take what steps it considers necessary to protect the safety of foreigners. As a precautionary measure a warship was sent from Malta to Alexandria. Official opinion in London was that the situation was "distinctly grave." The trouble goes back to the murder of Sir Lee Stack in November, 1924, by Nationalists. Zoglu, a Nationalist leader, then resigned as premier. He always has been considered unfriendly to Great Britain. Some of the murderers of Stack were executed. Those recently acquitted also were accused of this crime and Lord Lloyd, British high commissioner, says the court was so influenced by Zoglu's electoral victory that it did not dare pass sentence on them, though the evidence of their guilt was complete.

MARSHAL PILSUDSKI didn't want to be president of Poland, after all. He was elected by the national assembly, but declined the honor because he had no confidence in the people who elected him. He still insisted that the constitution must be changed. Next day the assembly chose for president Prof. Ignatz Moscicki of Lemberg college, admittedly a simple instrument in the hands of the dictator. The situation in Poland is confusing and dangerous. The Warsaw correspondent of the Chicago Tribune says:

"Nobody in Poland, even Marshal Pilsudski's closest friends, can get an expression from him on his program or plans. Nobody in Poland knows from where to expect orders or instructions, nor where the ship of state is drifting. The police and public services are becoming demoralized."

The opposition to Pilsudski is growing stronger and bolder daily, and he may be eliminated unless he stages another military coup.

WOMEN in attendance at the International Suffrage alliance convention in Paris had a lovely week of scrapping, the main result of which was the victory of the conservative element in the exclusion of the delegates from the National Woman's party of America. The latter demands equality of all rights for women while the League of Women Voters of America, which won in the struggle, believes the women should be especially protected in industry by law.

The Women's party representatives were supported by a number of liberals from other countries, and later these forced the adoption by the congress of two measures which amount to a demand for equality in certain forms of industrial legislation. The defeated women, headed by Mrs. Belmont, began laying the foundations for a new international association which, while not hostile to the alliance, will work solely for equal rights in everything.

FOR the first time in history a native-born American has captured the British amateur golf championship. Jess Sweetser, accomplished this feat in impressive style at Muirfield, Scotland. Then the American Walker cup team, of which Sweetser was a member, went into action at St. Andrews, winning three of the four two-ball foursomes the first day. The second day the Yankees clinched the possession of the trophy by winning three of the eight individual matches. The British won four and one was all square.

MILITARY leaders in Portugal have accomplished a bloodless coup d'etat and the cabinet and President Machado have resigned. Commander Cabecadas, Gen. Gomes da Costa and Senator Carmona now control the government.

UNDER most trying conditions the American balloon Goodyear III won the Gordon Bennett trophy race which started in Belgium. Another American entry got second place.

That covers a lot. Perhaps a sense of humor is a help to a club husband. "The ideal club husband must have wisdom and energy and foresight, so that his talents can fill in where the woman's leaves off," says Mrs. Walter B. Leach, president of the Brookline (Mass.) Women's club, who pledged \$10 "for the club husbands, and for my twenty-ninth anniversary with mine."

The state winning the prize for the best health summary was announced to be Ohio.

LIFE'S LITTLE JESTS

DESIRABLE DESTINATION

Charles Puffy, the rotund comedian from Germany who hopes for stellar honors in pictures, was walking down Hollywood boulevard one day when he encountered Laura La Plante, the dazzling U. star.

"Are you walking to reduce?" demanded Laura.

"Where is that?" Puffy wanted to know.—Los Angeles Times.

An Awkward Number

"What is it now?"

"Some of your constituents, senator."

"How many?"

"About fifteen."

"Awkward number. Not enough for a speech and too many to take to lunch."

HAD DREAMY EYES

He—I love your dreamy eyes. She—Yes? It's these late petting parties give 'em to me.

Look Just the Same

Among the uplifters it has caused a lot of consternation. To have the fashions let the eyes bat for imagination.

Thrill in Disguise

"I hear that you've bought your daughter an automobile. Pretty expensive game isn't it?"

"No, it's a matter of economy. I figured that the car will keep her away from bridge parties."

A WEIGHTY SUBJECT

Pewee—Where do you want me to hang this portrait of your father? His Wife—Don't try to lift that portrait. You'll strain your back. Father weighed two hundred and fifty pounds when he had it painted.

Prize of the Lot

An egotist in Ezra Meggs. He thinks HE could Unscramble eggs.

Knew by Experience

Foley—What makes you so sure that you can't afford to own a car, old man?

Rowles—I have one.—Stray Stories.

Persona Non Grata

He—Would you like to dance this one?

She—Yes, Would you mind hunting up a partner for me?

Her Error

He had spoken to her on the street and she was properly insulted.

"I don't know you from Adam!" she exclaimed indignantly.

"You ought to," he retorted mildly, "I'm dressed differently."

Sizing Them Up

Hardware Clerk—I never judge a man by his cigars.

Plumber's Helper—Neither do I. I judge him by the pipe he smokes.—Good Hardware.

For Enjoyment's Sake

Girl in Box Office—Sorry, sir, I have nothing left but two single seats in different parts of the house.

Customer—Good! I'll take 'em. I'm going to bring my wife.—Good Hardware.

Some Voice

Doctor—Your voice is very weak. How was it before you became ill?

Patience—I was a foreman in a boiler factory, doc, and used to whisper my orders.

Made 'Em Feel at Home

Friend—How do you ever manage to entertain your company in so small a flat?

Street Car Manager's Wife—When the seats are all taken I hang straps on the walls.

Retort Subtle

"Ah, s'pose you ain't had no dinnahs given in yo' honor, Henry?"

"Hush yo' fuss, niggah, befor you gets a sermon in yo' memory."—Harvard Lampoon.

There is no such thing as "refrigeration trouble" in the household that uses Ice. A block of Ice never gets out of order. It is Safe, Economical and Dependable—all the time.

Qualities Needed by "Ideal Club Husband"

Atlantic City.—The wisdom of Solomon, the patience of Job, the skill of David's body servant and the iron will of Jonah, who would not give in to the whale, go to make up an "ideal club husband," as publicly declared and privately described by members of the General Federation of Woman's Clubs.

"The ideal club husband must, of course, be interested in women's

public activities, must encourage her in them, must go to conventions with her and help her and the other women in all the ways a man can, as my husband does," Mrs. Charles Sloan of Philadelphia told the Associated Press. Mrs. Sloan pledged \$10 from the floor, as she announced, "in honor of an ideal club husband."

"This is the third big convention which my husband has attended with me," she said. "We have been married forty years. His qualities? Oh, he is just a good man, and I guess

that covers a lot. Perhaps a sense of humor is a help to a club husband."

The state winning the prize for the best health summary was announced to be Ohio.

That covers a lot. Perhaps a sense of humor is a help to a club husband. "The ideal club husband must have wisdom and energy and foresight, so that his talents can fill in where the woman's leaves off," says Mrs. Walter B. Leach, president of the Brookline (Mass.) Women's club, who pledged \$10 "for the club husbands, and for my twenty-ninth anniversary with mine."

St. Louis Honors Rogers Hornsby

Herewith is a photographic reproduction of the bronze medal presented to Rogers Hornsby at St. Louis on Saturday, May 22, as a token for his having won the honor of being the most valuable player in the National league for the season of 1925. This medal, cast from a special design by a New York artist for the National league, was presented to the champion batsman on Hornsby day, a great day for St. Louis fans. James M. Gould, president of the Baseball Writers of America, made the presentation.

There were ceremonies at the St. Louis park, and President John Heydler was there to represent the league.

In addition to the medal Hornsby also received \$1,000 in gold. The National league thus adds a material reward to the honor accorded its most valuable player each year.

Major Leaguers Can Qualify as Golf Pros

Though golf has been banned by a number of the major league managers, and on some teams may not be indulged in during the playing season, a number of big league ball players are competent enough to get jobs as golf professionals.

Foremost among them is Pep Young, the Giant outfielder, who showed his heels to a number of pros in the Texas championship this year. Pep can shoot most of the southern courses in the lower seventies, and do it consistently.

Sam Rice, the Washington outfielder, is another. Sam has a trunk full of golf trophies and, despite the opinion of many, golfing has not injured the batting ability of these two men.

There are many others. Arnold Stutz, the former Chicago White Sox outfielder, earned the sobriquet of "Jigger" because of his golfing abilities.

SCIOTO COUNTRY CLUB NOW READY

Course Pronounced Fit by George Sargent, Pro.

With the formal opening of the club's 1926 season, the Scioto Country club course at Columbus, Ohio, which will be the scene July 8-10 of the national open championships, was pronounced fit by George Sargent, the home "pro" who in 1909 won the national open, and who for half a dozen years has been president of the Professional Golfers' Association of America.

Two 18-hole handicap tournaments for the club members formally inaugurated the reconstructed Scioto course. In anticipation of the national open the course has been partially rebuilt.

"It will take the best in the trick bag of any golfer—pro or amateur," Sargent predicted, "to keep the hand of the Scioto course when the national open is run off in July."

The course always was difficult enough to bring out the best—or the worst—in any player's repertoire. But its greens have been rebuilt, some of its holes lengthened and one shortened, and other changes made. This is the basis for Sargent's prediction that superb golf will be in order for the national open.

Scioto is the more difficult because it looks easy. It is severe without being unfair. The utmost advantage has been taken of its gentle, naturally undulating terrain and its long water-course so as to bring out the best golfing skill.

The reconstructed Scioto course is 6,675 yards in length, measuring the individual holes from the center of the tees to the center of the green. Par for the course is still 72, although as rebuilt it is considered to be harder than the former layout, for which par was also 72.

Grimes Still Good

Burleigh Grimes, one of the few remaining spitballers in the National league, is more than holding his own this year with the Brooklyn Dodgers. He is winning games with much regularity.

Buddy Ryan Insisted on Writing His Own Wires

Sig Hart, fighter of the bantam class back in 1905, later a politician, and a handler of fighters, was in a lighter, fuller weight. Sig doesn't think all fighters are dumb, but he thinks they have their peculiarities.

Hart and Buddy had gone to Port Huron, where Buddy was to fight Mike Ward. At the hotel as Sig and Buddy parted to go to their rooms before the fight, Hart turned to say:

"I'll send that telegram, you usually send to your mother, Buddy, and tell her everything is O. K. and I'll sign your name."

"All right," said Buddy, and went on toward the elevator. Sig went in to write the telegram when he felt a tug on his arm. It was Buddy.

"Wait a minute, Sig," said the boxer. "I want to send that telegram. Mother knows my handwriting."

Buddy was strong for details which may explain how he rose to titular heights.

Giants Prove Costly

According to reports, the Chamber of Commerce in Sarasota had to fork over a lot of coin to the New York Giants, for the local fans did not patronize the games as much as was expected. A sum of \$50,000 was guaranteed the McGrawmen, but the gate receipts only totaled about \$3,000. No wonder. The price per head was \$2, and an additional dollar was charged for parking privileges, were one's car a flier or limousine. That was more than the fans would stand.

Sporting Squibs

There are now 879 public swimming pools throughout the United States.

The cost of laying out golf links in the United States varies from \$50 to \$120,000.

Bill Johnston has been ranked among the ten leading American tennis players since 1913.

Starting with only 12 clubs in 1880, the Amateur Boxing association of England now controls 300.

Skilled terrors are becoming scarce in Spain, where the bullfight is beginning to lose its popularity.

The Toronto Cricket club is the oldest club of its kind in Canada, having played a match with the Upper Canada college 90 years ago.

Americans will participate in the French motor boat show in Paris, October 7 to 17. It will be the initial show of the kind in France.

Experts declare that a team match between the ten best professional golfers and the ten best amateurs would undoubtedly be won by the latter.

H. L. Collins, captain of the Australian cricket team now competing in England, is popularly known in his home land as "Horseshoe Luck."

Mile. Curabet is the first woman in France to referee a rugby football match. Thousands of fans saw this novel sight during a recent game in Paris.

University of Oregon at Eugene has nine handball courts. They are used by the faculty and students during the day and business men of the city can occupy them in the evenings.

A mile race between Paavo Nurmi and R. A. Rose of New Zealand may be a feature of the English Amateur association track and field meet in Stamford Bridge, London, in July.

Approval of Walter C. Hagen as captain of an American team of professional golfers which will invade Great Britain this year was announced by the Professional Golfers' association.

A girl at the University of California put the eight-pound shot 38 feet 5 inches, thereby winning the women's championship, and causing sober reflection, no doubt, among the ranks of her suitors.

Van Gilder Is Winner

Although the St. Louis Browns have not been able to strike their stride so far this season, Pitcher Van Gilder has shown good form and is winning most of his games.

Lacrosse Gains Favor

Lacrosse, a comparatively new intercollegiate sport, has gained a firm foothold in 25 American universities and, in the opinion of P. M. Touchton, Yale coach, is threatening the popularity of baseball. English colonists found the Indians playing the game 300 years ago, said Touchton. At that time it was known as "bagatway," a struggle lasting several days, in which the squaws would lash the players on to greater efforts, adding much excitement to the game.

Sets World's Record

Here is a photograph of Lillian Copeland who broke the world's record recently in Los Angeles for the women's shot put. Lillian is from the Pasadena Athletic and Country club, and by putting an eight-pound shot 38 feet 8 1/2 inches established a new world's record.

BASEBALL SQUIBS

The Cubs, like the Robins, are going at a fast clip.

Walter Johnson seems to be like Tampa, getting better every year.

Old men who refuse to quit: Walter Johnson, Ty Cobb, Chauncey Depew.

There probably also will be many home runs made after the game ends.

Frank Brant of the Los Angeles club makes 38 different moves before taking a swing at the bat.

Babe Ruth, who began at the top with the Yanks, is gradually working down into the organization.

Walter Johnson still holds the American league record for wild pitches—21 in the season of 1910.

Bill Purcell, former big leaguer, has been named manager of the Columbia team of the South Atlantic association.

A number of teams picked for pennant contenders in March seem to be backing up ten or fifteen games for a good start.

L. S. Gulschard, 27, star pitcher of the University of Southern California baseball team, was elected captain of the Trojan diamond men.

Kenneth L. "Tox" Wilson, athletic director at the Northwestern university, denies reports that the school expects to drop baseball as a varsity sport.

Manager Tyrus R. Cobb says that recruit pitchers who start off at a fast pace generally even up with the veterans near the end of the season, if they do not fall below them.

With Nehf a member of the Cincinnati pitching staff, fans wonder if the club can have a more brilliant-looking squad. There are now three left-handers on the Red staff including Nehf, May and Rixey.

Baseball bats were made of hickory in former days, but this wood is now so scarce that ash is used for bat-making.

Fort Worth has obtained infielder Joe Hatchett from the Detroit Tigers. He is a former Virginia military institute athlete.

Frank Fuller, infielder, obtained by the Memphis Southern Association club from Birmingham, was released on option to the New Haven club of the Eastern league.

CHAPTER VIII—Continued

—12—

He flung himself into the work with feverish ambition and belief. Baxter he saw little of these days nor did he tell him of his plans or state that he had secured an office. Baxter had told Caleb that he was busy trying to find the right tract of land for his "Little Colony."

"They are inclined to be fussy," he said. "I've got one or two propositions, but I'm afraid they won't exactly suit. And I've got to swing this deal." By which Caleb inferred that he needed money badly for his affair with the stenographer.

"Not going to get married, are you?" inquired Baxter jestingly. "I suppose you were browsing over at El Nido when you acquired that tan. She must be some girl. I told you you'd fall hard." The matter's due at Del Monte tomorrow," he went on. "I thought I'd need her to help me out, but, if I pull off this stock deal, I'll be in clover. Good job I didn't write her. Something usually shows up if you're in luck. If you're not, why, that's all there is to it."

He frowned. Caleb saw him looking at his picture gallery on the bureau.

"How are things going in that direction?" he asked.

"Meaning Mary Morgan? That's her name," Baxter picked up the silver frame. His face was still clouded. "She's getting hard to handle. Still hanging on to her job. Wants me to marry her, but insists upon the child being born, anyway. Says she always wanted one. She's an enigma to me. I think I'll be able to transfer her to a gun-metal setting before long. Here's hoping! Tell me about your doings across the bay, for that's where you were, of course."

But Caleb did not care to discuss Betty, and the telephone broke their chat.

"It's the Morgan girl," said Baxter. "She's getting to be a pest, but she's got to be jolled. Be sorry for me, Caleb."

Caleb cocked his eyebrow. The reference to the stenographer as "the Morgan girl," after all that had happened and still lay between them, struck him as particularly callous. Still, Baxter often spoke with affected bravado. Caleb kept silent.

CHAPTER IX

Progress

The work went swiftly. His preliminary specifications ended and the drawings traced and blue-printed. Caleb started on his model. From the maps of the geodetic survey he panted a scale enlargement of the lower end of the Caliente plain and much of the surrounding district, including Gabilan mountain.

Baxter had run down to Del Monte to pay a duty call to his mother. Duty, in Baxter's case, Caleb surmised, as with his affection, was largely a matter of keeping his mother in good humor whereby the financial supplies might be more lavishly and easily forthcoming. Baxter was too selfish; after years of indulgence and spoiling, to have much genuine love for each other. In one of the gossiping waffles at the club—not Vedder's Pioneer—Caleb noticed an item that caught his eye with the mention of the Baxter name.

"It is rumored by Dame Gossip," ran the paragraph, "that Ted Baxter, who, by the way, has been hanging up some creditable scores in the golf tournament on the Del Monte links, is not overjoyed at the insinuating chatter that persists in suggesting that he may shortly acquire a stepfather. Gossip has been rife in this direction before, but now intentions seem to be serious. It is hinted that young Baxter may emulate the example of his stepfather, to-be. A double wedding is not entirely out of prospect, according to those who claim to have watched Ted strolling on the fair-grounds in the early mornings with a certain demure, and who have inherited a fortune from the interests closely connected with the lumber industry."

Caleb could not guess, and did not care to, the name of the girl referred to. And Caleb whistled under his breath.

"If Mary Morgan sees this item," he told himself, "she is likely to stir up things. I wonder how Ted's stock deal is prospering?"

Baxter had not told him the name of the shares with which he was speculating. But he noticed the girl the next morning as he passed through an outer office to Cox's private room by appointment. She was not in tailored clothes but in a lighter, fuller costume. Her face was startlingly pale save where she rouged her cheeks and reddened her full lips. The dark half-moons beneath her eyes emphasized their glance and, for a moment, Caleb felt it full upon him. He thought that it half besought, half challenged him not to speak of her to Cox. And then the mouth grew silent and she turned away as Cox's secretary held the door open for Caleb.

"Come to accept the Beaver Lake proposition?" asked Cox, rising to meet him. His brows contracted and his look hardened a trifle when Caleb shook his head.

"I think not. I've come to make a proposition instead."

"Yes?" said Cox shortly, his tone as noncommittal as the tick of a clock, while he shoved the cigar box across his desk.

Caleb put the tips of all ten of his fingers on the shining surface of Cox's desk and leaned forward a little.

"You said that the Crystal Springs company is in the business of buying, conveying and selling water. It is the first consideration that holds my proposition. What will you give me for two million daily gallons of pure water, with constant renewed supply, within a reasonable distance of Golden and capable of development at costs that will leave you amply profit?"

Cox lit his cigar slowly and, under cover of the smoke, closely surveyed Caleb's face.

"Two million gallons daily? You mean what will I give you for your in-

formation as to where I can secure this?"

"And my plans for development. Conservation, storage, filtration, collection, piping, pumping?"

"Ah! Pumping? It isn't on this side of the bay, then?"

The question came swiftly, backing a swifter glance.

"You told me yourself that the water development on the peninsula was practically developed to its limit," checked Caleb. "It is across the bay."

"We have many prospects there ourselves. Plans half developed. It is unlikely that you offer me anything new. Have you spoken to Mr. Hinckley about it?"

"Hardly. I wished to talk with you direct. I believe you have not looked into this particular method of exploitation or more than suspected the source of supply."

Cox smiled and pushed aside some papers carelessly.

"If that is so," he answered, "I will give you one-half a cent per gallon for your secret."

"Ten thousand dollars? You are not liberal, Mr. Cox. I am not visionary in this matter. I am prepared to show you and your engineers a complete project, without estimating exact costs. But, if my general plans are not approved by Mr. Hinckley and his associates, if my source is not authentic, if it is not sufficient, I do not figure that I have anything to sell. But I want to know where I stand before I submit facts and figures."

For a moment they remained silent. The elder seated, Caleb standing. Cox patiently appraising him. The latter spoke first.

"How much do you want?"

"One hundred thousand dollars and recognition of myself as the originator of the plan. I do not expect to in any way displace Mr. Hinckley. I have not his experience. Quite probably I

Found Baxter Changing His Clothes.

lack his ability. But I should want an appointment as consulting engineer on the work, and publicity as the projector."

Cox beat a little tattoo with his fingers on the desk top. He looked out of the window.

"I'm not the Crystal Springs company," he said finally. "I can't buy pigs in pokes. You'll have to show me more of your project. If it's all you say I have no doubt we can come to terms."

"I have stated my terms."

"You'll have to take a chance with us, Warner," Cox said with a smile. "We are not exactly highway robbers, we westerners. And we don't mind paying for information. But I can't deal in 'ifs.' Send up your model, bring in your papers tomorrow afternoon. I'll have Hinckley here. We'll talk further. If it promises well I'll get the directors together and you shall present your proposition at the meeting. That agreeable?"

They shook hands on it and Caleb

left the office practically content. After dinner at the club, alone, he found a telegram awaiting him in his room. It was a notice from the local bank that the deal for his house had been completed and that the purchase price, eight thousand dollars, less certain fees, now lay to his order.

"Which," said Caleb, as he stuffed the message back in its yellow envelope, "rounds out the day very nicely."

Next morning Caleb got up late and leisurely, three hours after his usual time. He ordered breakfast sent up from the dining room and lingered over his bath and shaving before he settled down in the window, grapefruit before him, the daily paper to one side.

From the outer pane a face looked at him that seemed familiar, though, for the moment, he could not place it. Even the flaring two-column head did not supply the link immediately.

"ROMANCE IN HIGH LIFE
"Popular Society Widow
"Weds Eastern Man
"and Millionaire."

Then he read the caption under the halftone picture: "Mrs. Ernestine Leroy Baxter, whose quiet wedding is the talk of Nob Hill."

It was the resemblance to Ted that Caleb had noticed. He read the article. The Del Monte correspondent referred to it as a romance. It appeared that the couple had been married quietly at Monterey and had left for a protracted honeymoon in the private car of the bridegroom.

It was not Caleb's affair and he had his own business to attend to. Baxter would show up in his own good time. Caleb finished his breakfast and went down to his office to superintend the packing of the model and its dispatch to Cox. Later he visited his bank. It was noon before he got back to the apartment house.

He found Baxter changing his clothes. His face was pasty, the whites of his eyes congested. To Caleb the signs were plain. Baxter had been making a night of it.

"Seen the paper, I suppose?" Baxter greeted Caleb. "There's the devil to pay all around. The matter's gone and so's my income. Look at that."

He picked up a slip of pink paper from his dressing table and handed it to Caleb. It was a check for one thousand dollars.

"Signed by papa-in-law," said Baxter sarcastically. "A present to a good boy. God bless you—and goodbye!"

"Do you know what she did?" he asked truculently. "Mortgaged every bean she had to catch this millionaire. Played her last cent on the red heart and won. She had the right to do what she liked with my father's money under the will, but it was understood that she was to look out for me."

"Soon as I got down to Del Monte I saw what her game was. And I wasn't welcome. The bridegroom on the look looked at me as if he expected to see a little boy in knickerbockers. She kidded him along properly. No use looking at me in that Methodist way, Caleb. I'm bitter and I have a right to be. She was twenty-four when she married my father and she never intended to be a mother. Thought it'd spoil her figure. I've heard her say so. I was only a kid when I overheard that, but it illuminated things a lot. I knew then why I never had a mother like other kids. I was an unfortunate accident. A snake has more affection for its eggs than she ever had for me."

"I tell you, Cal," the way she acted round that old fool would make you sick. With the airs and graces of a young girl. Fench! She wanted me to go back to Golden. I looked too much like an animated birth certificate to suit her play. No doubt she told him what a wayward youth I was. When I wouldn't stand up to the wedding—we had a sweet row about that and I bolted over a bit—she calmly told me she was broke. Said her trousseau had exhausted her bank account and her capital. Yesterday afternoon this check came to me in a letter from her. I tore the letter up. Hoped I'd settle down to something serious and inclosed a check from her husband. Said she didn't expect to see me for some time. They were going to travel extensively. (TO BE CONTINUED.)

Frisco's Unique Colony of Italian Fishermen

On the San Francisco water front today you may find a fascinating bit of the picturesque Old world brought to America and made over into a thriving enterprise by the methods of science.

There, huddled along the Fishermen's wharf, you may see a nest of 40 boats owned by a colony of Italian fishermen. Transplanted bodily—language, customs and boats—from the Mediterranean to the Pacific, these hardy men are reaping a harvest of wealth in shining salmon from the deep sea outside the Golden Gate.

In their little boats, says Popular Science Monthly, they have replaced with gas engines the lateen sails used for centuries by their forefathers. In place of oldtime nets and hand lines, they have substituted long, springy

trawling rods with which four fishermen now can bring in a larger catch in one day than eight men formerly did in two.

By the use of modern appliances they have changed "fishermen's luck" into scientific skill that seldom fails. And as a result a single boat now averages \$100 worth of fish at a trip—sometimes reaching as high as \$500.

Accommodating Captain
A good story has been retailed by the passengers of a big ocean liner. It seems that the gigantic boat stopped at a small Southern port on a winter cruise, occasioning the most appalling amount of excitement among the natives. The captain of the little tender which came to take the passengers off almost burst with importance. He brought his boat alongside most pompously, shouting orders in Italian, and doing everything wrong. Three times he tried to make connection with the liner's gangway, and three times failed. The first time the liner's captain smiled; the second time he looked serious; and the third time his face became congealed with fury. "Stand by," he bawled through the megaphone, "and I'll bring my ship alongside."—The New Yorker.

No Chance for Arguer
"I lead a dog's life," said a big-town husband, in a tiff with his wife. "Right you are," said she. "You come in the house with muddy feet, get a comfortable place near the fire and wait to be fed."—Capper's Weekly.

CHILDREN'S NURSE RESUMES HER DUTIES

Praises Lydia E. Pinkham's Vegetable Compound

"I have taken Lydia E. Pinkham's Vegetable Compound for some time and I would not be without it in the future. As I am a child nurse, I have to deal with a great many children who are sick. I have heard so much about this compound, and I have been taking it for some time now. I am able to do all my work and go out nursing babies and also use the Sanative Wash and it is beneficial."—Mrs. G. Green, Inc., 103 Davis St., Greenfield, Mass.

Valuable for Women
"I have found Lydia E. Pinkham's Vegetable Compound a valuable medicine for weakness."—Mrs. J. Pietsch, Box 397, Lancaster, Pa.

Hundreds of letters like this received by the Pinkham Medicine Company, are sent to the publishers, in Texas, Massachusetts, and Nebraska, and to the land to Nebraska say that the compound has improved since taking Lydia E. Pinkham's Vegetable Compound.

SATURDAY, JUNE 19, 1926

What College Students Should Know

Are you familiar with the outstanding figures in the history of the human race? How large is your knowledge of the outstanding facts of present-day civilization?

Here's an opportunity to test yourself on these questions. Following is a questionnaire presented to one hundred students representing four college years in a large American university. About one-third of the number were third or fourth year students. There were seven foreigners in the group. The test was given toward the end of the college year, with the work of the second semester nearing completion.

THE QUESTIONNAIRE

Tell why the following men and women were great. Give their nationality and, if possible, give the century in which they lived. Mention at least whether they are living or dead:

Per Cent Correct Answers	Per Cent Incorrect Answers	No Answer
1. Plato	80	15
2. Pericles	84	0
3. Horace Mann	23	17
4. Pestalozzi	15	85
5. Napoleon	100	0
6. Edward Jenner	2	14
7. Kepler	15	35
8. Kant	10	17
9. Michelangelo	95	5
10. Pasteur	26	74
11. Cleopatra	71	29
12. Alfred Nobel	2	18
13. Isaac Newton	64	36
14. Lee de Forest	1	4
15. Marconi	35	62
16. Goethe	20	45
17. Bernard Shaw	38	59
18. Copernicus	9	21
19. Darwin	72	26
20. Faraday	15	5
21. H. G. Wells	72	20
22. Martin Luther	56	36
23. Steinmetz	22	78
24. Solon	4	44
25. Anatole France	37	18

A distorted sense of values prompted the reply that the marcelle wave is one of the most important inventions," the writer continued. "The girl who made this assertion explained that the marcelle wave is a great aid to a woman's beauty, and that without beauty a woman cannot retain her power over man. Another young woman associated Luxor only with a beautifying cream. "Napoleon," thought nothing of sacrificing 2,000,000 lives to advance his own interests, yet the question concerning him brought a record of 100 per cent against only two correct answers with regard to Jenner. In a group of 100 college students, the story of Jenner's noble devotion and self-sacrifice in one of the greatest

"There were sixty questions in the list originally given," he continues. "The highest grade, 98 per cent, was made by a student of Slavic descent, twenty-two years old. The second rank, 97 per cent, was made by a more mature Russian. The highest grade made by a native American was 89 per cent; the lowest 10 per cent."

"It may be asked what is the purpose of such a questionnaire. Do the answers indicate with any degree of certainty the trend of thought of the modern college student, or justify our drawing any definite conclusions? First, the results seem to emphasize the current belief that a

PART II

majority of young people go to college today for a diploma. The memorizing of facts seems important insofar as it brings about this end. They are as quickly forgotten, and leave no lasting impression. In the modern college life there is no time for meditation; no time for assimilation or digestion. Students hurry to their classes and hurry away; the car facilitates their departure. An hour of jazz, a movie, or a whirl to the next town assists in eradicating any impression which may have been received in the classroom.

How many of these questions can you answer? Any good dictionary ought to provide most of the answers against which you can check your replies.

Per Cent Correct Answers	Various Answers
29. Name several Russian writers	0
30. Who wrote the Inferno?	8
31. Who wrote Paradise Lost?	97
32. Who were the French writers who largely contributed to the French Revolution?	5
33. Name five Italian painters	4
34. Give the names of several famous sculptors	4
35. Name a book written by Thomas Carlyle	16
36. What can you tell about Cervantes?	13
37. Who was Dismark? Is he dead or living?	13
38. Name the five great men who you think contributed most to our civilization	13
39. Which great man do you admire most? Tell why.	45
40. Locate accurately the following famous architects:	65
(a) The Parthenon	20
(b) The Pantheon	30
(c) The Eiffel Tower	60
(d) The Alhambra	30
(e) The Vatican	84
41. Locate the Yosemite	54

44. Have you ever heard of the Barbizon School? What can you say of it?	1
45. Which human race is the most populous?	61
46. What state has the largest population to the square mile?	1
47. What recent inventions do you consider the most useful to mankind?	1
48. What is a mausoleum? Can you locate a famous marble mausoleum in India?	7
49. Who applied the elements of Plane Geometry the first time?	27
50. How much money does France owe America?	99
51. Should she pay her debts?	99

emerge to more normal standards. Incidentally, there are those who believe that the man who gave the test, and examined the replies, failed, when he wrote his conclusions, to take into account the possibility that many of the students took the questionnaire not in the serious spirit in which it was submitted to them, but rather with a certain degree of levity and with their tongues in their cheeks. Furthermore, it was probably a volunteer test, and students, knowing that their academic life or death would be unaffected by what they wrote, were denied the benefit of that psychological pressure which often serves to inspire them to their best effort in a regular examination.

There were seven foreigners in the group. The test was given toward the end of the college year, with the work of the second semester nearing completion.

THE KITCHEN CABINET

Welcome, a thousand times welcome, ye dear and delicate neighbors—

Bird and bee and butterfly, and humming bird fairy fine!

Proud am I to offer you field for your graceful labors.

All the honey and all the seeds are yours in this garden of mine.

—Celia Thaxter—

FROZEN DISHES

There is nothing more appealing to the palate on a hot day than the refreshing frozen dishes.

With a cupful of strawberry juice, raspberry juice, grape juice or in fact almost any good flavored fruit juice, sweetened to taste and frozen with a pint of thin cream and a tablespoonful or two of lemon juice, one may have a delightful frozen dessert.

Water ices are prepared by boiling together sugar and water; cool and add the strained fruit juice and freeze. A tablespoonful or two of lemon is always good to add to any fruit combination as it seems to bring out the other flavors. When a colored juice like grape or raspberry is used, the lemon seems to make the color more striking.

Velvet Sherbet.—This is one of the simplest and most liked of all the frozen desserts: Take two cupfuls of sugar, the juice of three lemons and one quart of rich milk. Mix and freeze as usual. Let stand two hours to ripen. The mixture will curdle when being put together, but will freeze as smooth as velvet.

Strawberry Ice Cream.—Mash a quart of the berries, strain carefully and sweeten with a sugar and water syrup which has been boiled and cooled. Add a quart of rich milk, or milk and cream, or a quart of thin cream, making a richer ice; add a pinch of salt and freeze as usual. Always pack the ice cream after freezing and let stand an hour or two, as it seems to be better flavored so treated.

All frozen dishes stand up better when served, that is, firmer, if a sugar syrup is used instead of sweetening with sugar.

Peanuts and Lettuce.—If one likes peanuts this will be enjoyed: Sprinkle head lettuce with rolled, or coarsely chopped peanuts, serve with a bit of shredded onion, or that may be omitted. Serve with French or a boiled dressing highly seasoned.

Frozen foods and chilled drinks are invaluable in the sickroom, as are the hot soups and broths. All food intended to be served hot should be hot, and all cold foods cold. It is well, when possible, to place the dishes on the tray and pour into them, to avoid spilling.

Chocolate Dainties.—Chocolate is such a general favorite that nearly everybody enjoys a recipe of the popular food.

French Chocolate.—Melt two ounces of bitter chocolate, add two tablespoonfuls of sugar and one-half cupful of water, boiling hot. Cook three minutes. Scald three cupfuls of milk with one-fourth of a cupful of finely ground coffee, strain and add the chocolate with one-eighth of a teaspoonful of salt. Beat with a Dover egg beater and serve with whipped cream.

Chocolate Sauce.—Cook two squares of chocolate, a cupful of sugar and one-half cupful of water together with two tablespoonfuls of butter and one-fourth teaspoonful of salt. Cook twelve minutes, add a teaspoonful of vanilla and serve hot. Very nice over vanilla ice cream. Omit the flavoring when serving over ice cream flavored with vanilla.

Chocolate Mousse.—Melt three squares of chocolate, add one and one-half cupfuls of sugar and one cupful of thin cream; boil one minute, cool, add a teaspoonful of vanilla, a pinch of salt and the whip from three cupfuls of heavy cream. A tablespoonful of gelatin mixed with a little cold water is added to the hot mixture. Pour into a mold and let stand packed in ice and salt four hours.

Cocoa Ice Cream.—Take two cupfuls of milk, one cupful of sugar, one tablespoonful of cornstarch or arrowroot, and one-half cupful of cocoa; cook in a double boiler for twenty minutes. Add four egg yolks well beaten, a teaspoonful of vanilla and a little salt. Freeze as usual.

Cocoa Parfait.—Boil one cupful of sugar with one-half cupful of water ten minutes; pour the syrup over four tablespoonfuls of cocoa which has been beaten with four egg yolks, cook over hot water until of the consistency of soft custard. Beat until cold, add two cupfuls of whipped cream flavored with a little vanilla and a pinch of salt added. Turn into a mold and pack in ice and salt; let stand four hours.

Orange Chocolate Sauce.—Melt three tablespoonfuls of grated chocolate in a double boiler, add three tablespoonfuls of butter, stir until well mixed, add three egg yolks one at a time, four tablespoonfuls of sugar and one-fourth of a cupful of rich milk. Cook until thick, add the juice and rind of an orange and serve at once. Chocolate and orange flavors seem to be two that combine well.

Nellie Maxwell

Avoid Marring Linoleum

Furniture should always be lifted clear of the floor when being moved to prevent scratching or marring the linoleum. If a piano or other heavy furniture has to be rolled across the floor a board or heavy piece of carpet should be laid down to protect the linoleum.

No Doubt About Babbling

Silence is not always a sign of wisdom, but babbling is ever a folly.—Benjamin Franklin.

Children Cry for

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

War on Smallpox in China

Peking's great park-like Temple of Heaven enclosure, where emperors worshipped, is now the scene of a free vaccination clinic. In an effort to stamp out smallpox, the scourge of China, the central plague prevention bureau is establishing free vaccination points at various places. A special police order to physicians forbids old-fashioned Chinese vaccination and insists that more sanitary modern methods must be adhered to under penalty of heavy fine.

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds, Neuritis, Toothache, Neuralgia, Headache, Lumbago, Rheumatism, Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Drug-gists also sell bottles of 24 and 100.

Autos Destroy Poles

Two telephone poles are destroyed every day in Los Angeles, Cal., in automobile accidents. So say Carl A. Heinz, testifying as the chief engineer of the power system. He was relating the detailed expenses in operating the systems, and the loss of poles in automobile crashes was included as an item.

One Bad Fault

He—You have read my new novel. What do you think of it? She—The covers are too far apart.

Curser on thee, little pest

Filthy fly, unwelcome guest!

NO need to tolerate a single fly in your house. Flit kills flies.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly.

Women and Business

A man who is making money never runs away. It seems to be the rule that no matter how much a man thinks of a woman he will not run away with her if he has to give up a job or business that is very profitable.—R. W. Howe's Monthly.

Probably Wise

The book agent was trying to sound the stenog. "Now what kind of a man is Mr. Whoozis?" "Oh, he knows it all." "In that case I guess I'm wasting time in trying to sell him an encyclopedia."

For speedy and effective action, Dr. Perry's "Dead Shot" has no equal. A single dose cleans out Worms or Tapeworm. 172 Pearl St., N. Y. Adv.

Putting It Delicately

Young Man—Those your parents sitting over there? Young Woman—No; they're my god-parents. They brought me up. Young Man—I see. So you're a sort of cuckoo.—London Punch.
